Professional Summary

Software Developer with hands-on experience developing web applications using **Python, Django, JavaScript, React.js, Next.js, TypeScript, Node.js, REST APIs, and SQL databases**. Experienced in frontend development, backend application logic, REST API integration, CRUD operations, database management, debugging, testing, validation, error handling, and performance optimization. Hands-on experience building responsive user interfaces from **Figma designs**, integrating frontend applications with backend APIs, implementing data-driven features, and using **Git/GitHub for version control**. B.Tech graduate in Computer Science and Engineering, currently based in Dubai, UAE and available for immediate joining.

Technical Skills

- **Programming:** Python, JavaScript, TypeScript, Object-Oriented Programming (OOP)
- **Backend Development:** Python, Django, Node.js, REST API Development, Backend Logic, CRUD Operations
- **Frontend Development:** HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, Responsive Web Design
- **APIs & Integration:** RESTful APIs, API Integration, Third-Party API Integration, JSON, Data Validation, API Testing
- **Databases:** MySQL, PostgreSQL, SQLite, SQL, Django ORM, Database Operations
- **Software Development:** SDLC, Debugging, Testing, Error Handling, Performance Optimization, Application Maintenance
- **Version Control & Tools:** Git, GitHub, VS Code, Postman
- **Deployment:** Vercel, Render
- **Development Practices:** Agile Development, Responsive Design, Cross-Browser Compatibility

Experience

Software Developer – Zavry

August 2025 – July 2026

- Developed and maintained responsive web applications using **JavaScript, React.js, HTML5, CSS3, and modern software development practices**.
- Integrated **RESTful APIs** to connect frontend applications with backend services and retrieve, process, and display dynamic application data.
- Implemented data-driven features including **CRUD operations, search, pagination, filtering, and sorting**.
- Implemented **debouncing and lazy loading** to reduce unnecessary API requests, optimize search functionality, and improve application loading performance.
- Worked on **frontend–backend integration**, handling JSON data, API responses, data validation, and dynamic application workflows.
- Developed and maintained backend functionality using **Python, Django, REST APIs, and database operations**.
- Worked with **MySQL, PostgreSQL, and SQL** for data retrieval, database operations, and application data

management.

- Implemented backend features including **CRUD operations, API integration, validation, error handling, and application logic**.
- Performed **debugging, testing, troubleshooting, and performance optimization** to identify and resolve application issues.
- Used **Git and GitHub** for version control, including managing code changes, commits, branches, and application updates.
- Collaborated with developers and team members throughout the **Software Development Life Cycle (SDLC)** to develop, test, integrate, and deliver application features.

UI Developer – Valoriz Digital (Mozanta Technologies), Trivandrum

May 2025 – July 2025

- Developed responsive and user-focused web interfaces using **HTML5, CSS3, JavaScript, React.js, Next.js, TypeScript, and Tailwind CSS**.
- Converted **Figma designs into pixel-accurate, responsive user interfaces** while maintaining design consistency across different screen sizes.
- Built reusable and modular UI components following clean and maintainable frontend development practices.
- Developed responsive layouts for **desktop, tablet, and mobile devices** with attention to usability and visual consistency.
- Implemented **interactive UI elements, animations, transitions, hover effects, and smooth scrolling** to enhance user experience.
- Collaborated with **UI/UX designers and developers** to understand requirements and translate design concepts into functional web interfaces.
- Integrated frontend interfaces with **REST APIs** and handled dynamic data rendering where required.
- Debugged and resolved frontend issues related to **layout, responsiveness, functionality, and browser compatibility**.
- Optimized frontend performance, responsiveness, and overall user experience.

Python Django Full Stack Developer Intern – Luminar Technolab

July 2025 – February 2026

Remote

- Developed web applications using **Python and Django** following structured software development practices.
- Worked with **Django ORM, MySQL, REST APIs, and MVT architecture** for backend application development.
- Developed backend functionality including **CRUD operations, API integration, data validation, and application workflows**.
- Built responsive frontend interfaces using **HTML, CSS, JavaScript, and Bootstrap**.
- Implemented database operations and integrated application logic with frontend and backend components.
- Performed **debugging, testing, error handling, and troubleshooting** during application development.
- Worked on full-stack application development covering **database, backend logic, API integration, and frontend development**.

Projects

Anti-Ragging Solution Website – React.js, Node.js, MySQL

- Developed a responsive full-stack web application for reporting and managing incidents in educational institutions.
- Built interactive user interfaces and dashboards using **React.js** with responsive layouts for different devices.
- Implemented role-based authentication and interactive application functionality.
- Integrated React.js frontend components with **Node.js backend APIs** and MySQL database services.

Smart Resume Analyzer – Python, Django, PyPDF2

- Developed a web-based application using **Python and Django** for automated resume analysis and information extraction.
- Implemented **resume scoring, skill detection, keyword analysis, and job-role recommendation** functionality.
- Integrated backend processing and database functionality for managing resume information and analysis results.
- Implemented validation, error handling, and data processing features to improve application reliability.

Virtual Interview Preparation Coach – Python, OpenCV, BERT, Machine Learning

- Developed an AI-powered web application to simulate interview environments and provide personalized feedback.
- Implemented real-time emotion detection using **OpenCV** and sentiment analysis using **BERT**.
- Processed user inputs and generated personalized interview feedback using Python-based application logic.

Education

2021 – 2025	Bachelor of Technology (B.Tech) in Computer Science and Engineering Minor Specialization in Biomedical Engineering TKM Institute of Technology, Karuvellil, Kollam	CGPA: 7.95/10
2020 – 2021	Higher Secondary Education (Class XII) TKM HSS Karikode, Kollam	96.5% (Full A+)
2019 – 2020	Secondary School Leaving Certificate (SSLC) TKM HSS Karikode, Kollam	98% (Full A+)

Certifications

- Fundamentals of Artificial Intelligence – NPTEL, IIT Guwahati
- Introduction to Machine Learning – NPTEL, IIT Kharagpur
- React – Basic & Python – Basic – HackerRank
- Cloud SAP ERP Internship Certification – Innoval Digital Solutions
- Full Stack Web Development Workshop – TATHVA'22, NIT Calicut

Achievements & Activities

- Secured Second Prize in Inter-College Basketball Competition.
- Minor Specialization in Biomedical Engineering alongside B.Tech in Computer Science and Engineering.
- Participated in coding challenges, technical workshops, and hackathons.
- Volunteer Math Teacher under Project Ganitham, mentoring students from Grades 8–10.
